

# Christopher Wu - Full Stack Web Developer

wu.christophert@gmail.com | (213) 925-4842 | www.linkedin.com/in/christophertwu

I am a self taught full-stack developer with experience in Elixir, Ruby on Rails, HTML5, Javascript, and CSS. I have strong work ethics and always give my best effort on any project and task I am assigned to. I am a fast learner, take constructive criticism well and am a big team player.

## Experience

### Back End Developer (Elixir, Phoenix, Ruby on Rails)

*Peek Travel*

August 2018 - March 2020

- Quickly learned and implemented new technologies/languages(Elixir, Phoenix, LaTeX, GraphQL)
- Refactored older controllers in Elixir code base to use context modules and GraphQL
- Continuously migrated legacy Ruby on Rails models into Elixir as needed
- Squashed bugs and created new features like printable gift cards, LaTeX PDF for invoices, GDPR script, and allow editing of certain configurations easing customer pain points
- Collaborated with teammate to create API for Groupon partnership

### Full Stack Web Developer (Ruby on Rails)

*Beauty By Design*

May 2018 - August 2018

- Ramped up quickly and made contributions to code base
- Created and integrated new features such as charging/refunding consultation fees
- Refactored and DRY'd sections of the code base
- Implemented patch notes for easier and more efficient code reviews
- Pair programmed with other developers

### Full Stack Web Developer (Ruby On Rails)

*TrackR*

March 2016 - January 2018

- Refactored and created API endpoints for internal tools such as Shipstation, Shopify, Zendesk, as well as between the mobile app and the web backend
- Built new purchasing features for the site such as the ability for a customer to add a custom image on their devices, increasing sales and profit significantly
- Built the ability to see which Facebook friend referred you which increased virality and sharing.
- Built a one-click upsell feature which increased product pre-orders drastically
- Collaborated with the marketing and affiliates team to design and build marketing campaigns, AB tests, and landing pages
- Designed and maintained current features for the back-end and other internal tools to optimize customer support and operations teams' workflow

### Ruby on Rails Developer

*rhubarb studios*

September 2015 - February 2016

- Built out new features for web app, such as WYSIWYG, and ability to upload images
- Implemented Test Driven Development Increasing test coverage and maintained at 95%
- Debugged, refactored and maintained a DRY code base
